SPECIAL FINISHING TOOLS for AMATEURS

Numerous artistic designs can be worked up with these tools, three samples of which are shown here.

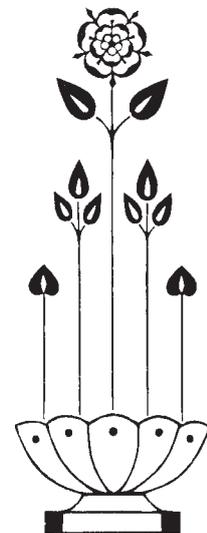

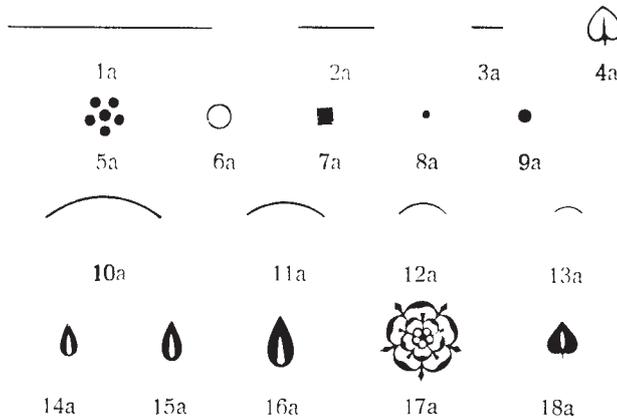

Nos. 1 and 2 are made up with a "Junior" set. No. 3 is made with a "Senior" set.

No. 1

No. 2

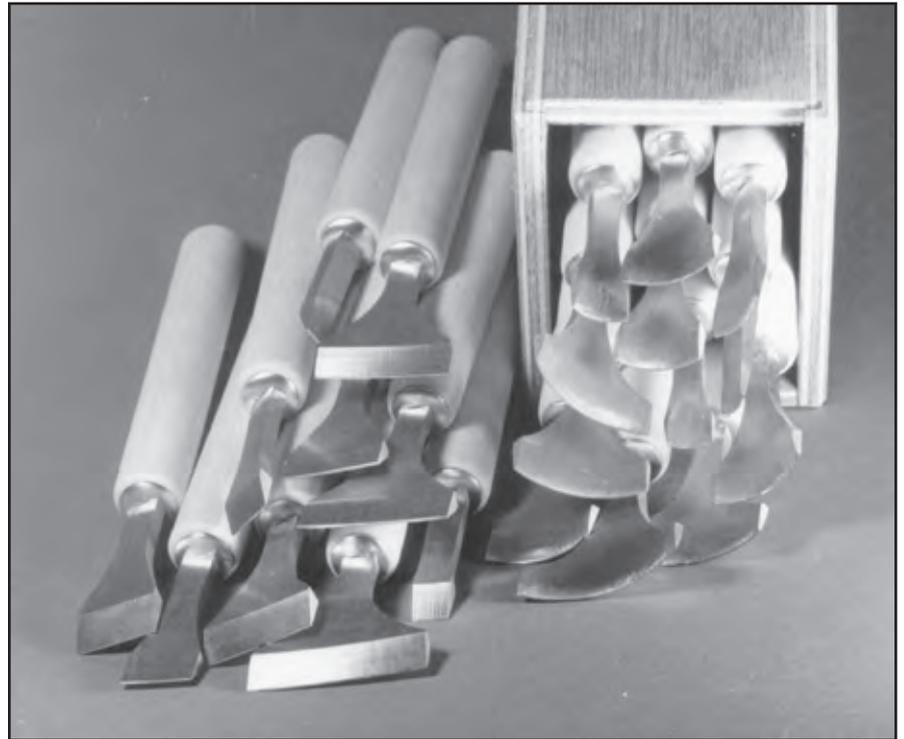

No. 3

Tools No. 1a to 12a constitute the "Junior" set.
The complete 18 tools constitute the "Senior" set.

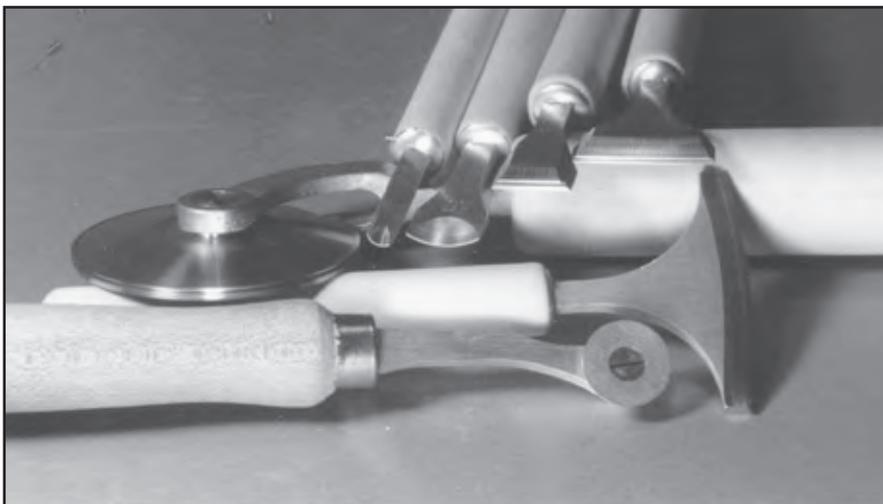

GOUGES AND PALLETS

Gouges and pallets are made from the same hard brass as our handtools and are cut from 5mm thick sheet. The gouges are then formed to the required curves before machining, this produces better sighting than traditional cast gouges. Pallets are finished flat on the sighting side with a long bevel on the reverse. They are supplied with a 9 inch arc as standard, but can be made flat if required.

Pallets come in sets of 10, either single line, double line or thick and thin line. Gouges are sold as a set of 12, a set of 5 semi-circle, or 4 circle gouges. For more aesthetic tooling our set of 40 designer gouges and 7 blending gouges are ideal - these are also available as a half set of 20 or they may be supplied individually (as can all tools).

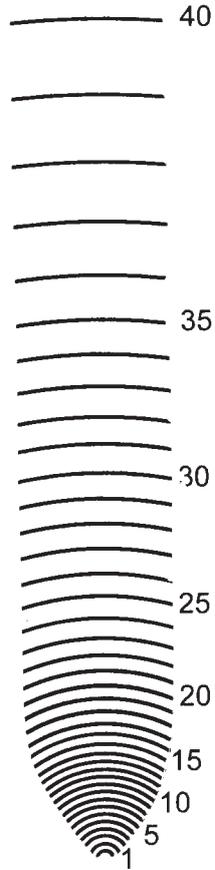

Unless otherwise requested all single line pallets and gouges are made with a 1.5 point (.020 inch / .5mm) line thickness. Double and thick and thin line are as shown on the following page and come with mitred ends. A starter set of gouges and pallets along with some simple handtools are available in the popular amateur sets (opposite page). Gouges, like our handtools are now made with a slightly domed face. All sets are supplied in strong wooden boxes.

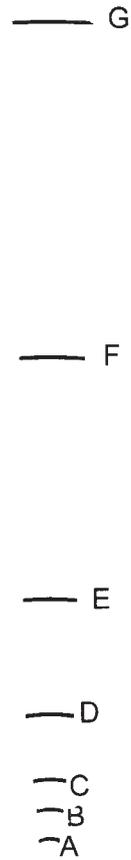

To complete the range of lining tools, 3 inch pallets, 3 inch diameter fillets and farthing wheels are also available.

DECORATIVE WHEELS AND FILLETS

The following pages show a comprehensive range of decorative wheels, many having been reproduced from period bindings, desk leathers and trade catalogues. They are made to the same high standard as our other tools, very deeply cut on turned blanks 3 inches in diameter (this may vary depending on length of pattern sections). The wheels are mounted between cast gun-metal forks with specially designed shouldered steel screws, that alleviate binding. They are sold complete with fork and handle although we can supply wheels only. Most decorative wheel designs can be reduced or enlarged to order, whilst fillets can be mitred to run into corners.

INTERCHANGEABLE SMALL WHEELS

We can also supply fillet and decorative wheels in the smaller size of approximately 1 1/2 inches in diameter (not suitable for longer patterns). They are 1/3 of the standard wheel price for the wheel only. The special fork and 12 inch handle is supplied separately in two widths, one for patterns up to 1/4 inch wide the other from 1/4 inch to 1/2 inch (wider designs not available in small wheels).

DECORATIVE PALLETS

Decorative and line pallets can be made to suit most decorative wheel and fillet designs and are supplied curved with a 10 inch diameter arc unless flat tools are requested when ordering. They are made 3 inches long as standard, but can be made shorter or up to 4 inches if required (some pattern lengths are too long to completely fit onto a pallet). 3 inch pallet prices are 1/3 of the respective wheel prices.

Our pallets are engraved with extra depth around the outer edge, leaving the indentations which are an essential visual aid for preventing ‘doubling’ when additional impressions need to be located.

DECORATIVE STRIPS

Type high brass strips are also available in most designs. Ideal for underlining or bordering alongside type, they can be cut any length up to 6 inch. The body size will be the nearest available standard point size. 4 inch strips are priced at 1/4 of the respective wheel price.

BRASS TYPE

Our brass type is made to the most rigorous standards from the same hard brass used for our other tools. The body is first machined to the exact point size and then ground accurately to the type height. The characters are deeply engraved using special jigs to ensure perfect alignment and excellent definition on most surfaces, when used either by hand in a typeholder, or in a blocking press.

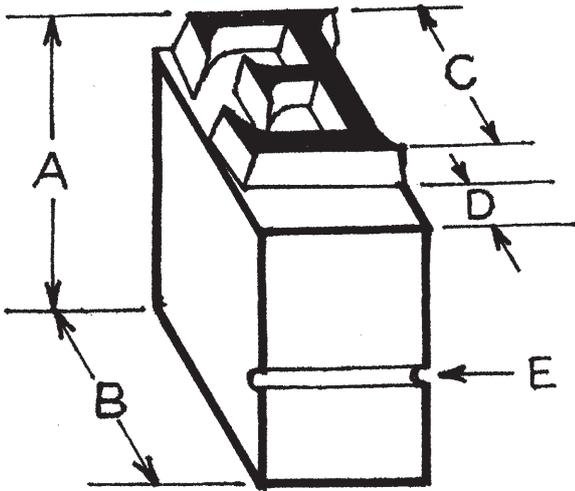

Our range of faces have been gradually increased and now includes 60 styles, which are shown on the following pages. To conserve space we now show a complete alphabet of each face followed by an example of each point size available, with the actual height shown in mms, (larger or smaller point sizes are available in a limited number of styles, please enquire). The names of some of the type faces have been 'invented' as they were reproduced from founders cast brass type, the names of them long forgotten.

The style sheets have been arranged for ease of comparison with sans serif faces first, followed by light serif faces, then Roman faces. Finally the scripts, decorative faces and foreign language fonts. Most faces are also available with accented letters for foreign languages (please supply details of requirements). Where frequently used words or phrases are required, dies can be supplied.

An index of type styles can be found at the back of the catalogue.

BRASS TYPE

A - TYPE HEIGHT - BRITISH TYPE HIGH
= .9195ins (23.35mms)

B - BODY (POINT SIZE) 72 POINT = 1 inch

C - HEIGHT OF FACE - SHOWN IN mms
ON STYLE SHEETS

D - BEARD (SEE NOTE BELOW)

E - NICK - DENOTES BOTTOM OF
LETTER

NOTE:- The majority of faces are of a height that will accommodate lower case descenders on the beard thus doing away with the need for stepped bodies.

All type is supplied British printers type high (other heights supplied to order). Our type is normally engraved flush top as shown (centrally engraved type can be supplied if required). 6 point type is engraved on an 8 point body.

QUADS AND SPACERS

Quads and spacers are supplied as a set of 12 various width quads and 50 hair spacers, in all standard point sizes

COMBINATION OF STANDARD FONTS

Our standard font combinations are as shown below, although any desired combination can be supplied on request. Additional punctuation, fractions, foreign accents etc. can be supplied as extras, price on application.

TYPEHOLDERS

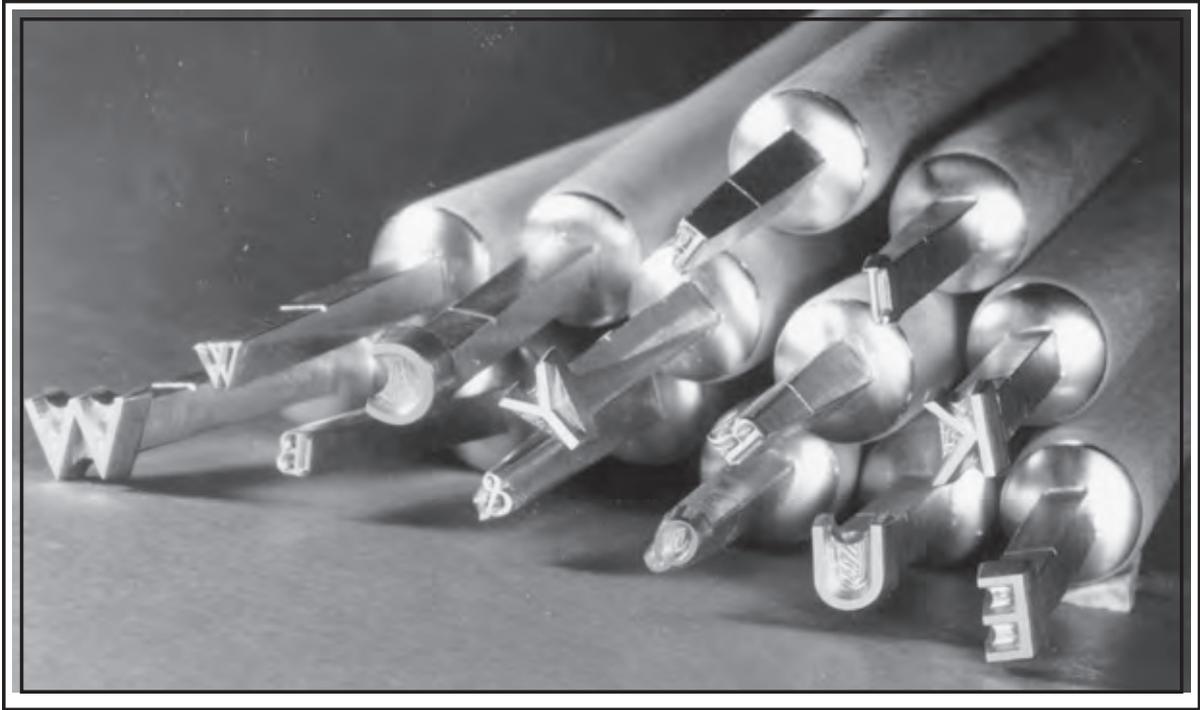

Standard spring typeholders are supplied in 3 sizes 2, 3 and 4 inch and will accept type from 8pt to 36pt. They are cast from gun metal and machined square inside. The steel backplate is bevelled to a fine edge to aid sighting.

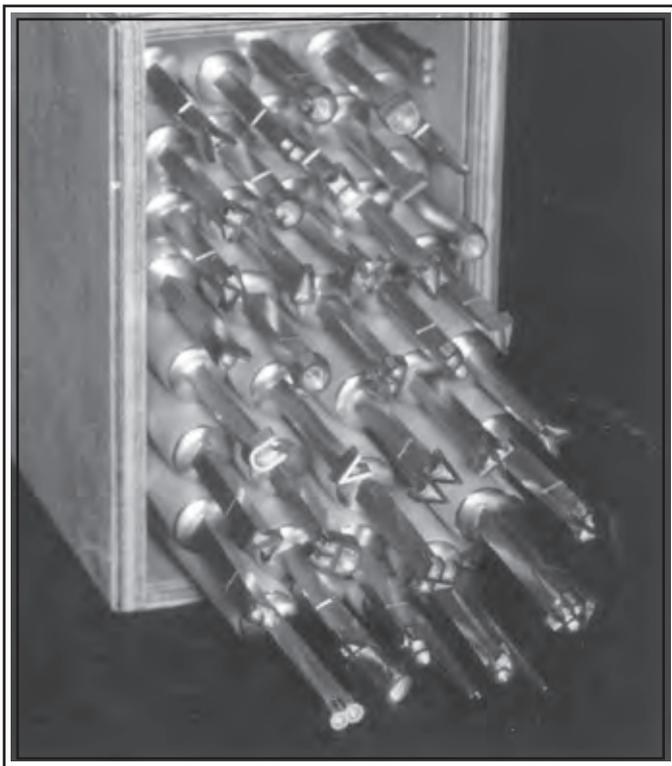

Super rapid typeholders are self centring and accept type from 10pt to 36pt in 4 inch length only. The two jaws are centred when the right hand screw is turned to make side spacing unnecessary.

HANDLE LETTERS

Handle letters can be supplied in any of the brass type styles as shown. The larger point sizes are engraved on domed heads and cut close to the letter form. Smaller letters are filed closely, and right back along the shank, to produce a tool with perfect sighting and ease of use. Finally a sighting line is machined square to the face to aid alignment. Larger letters of up to 72 point are available in a limited number of styles (please enquire).

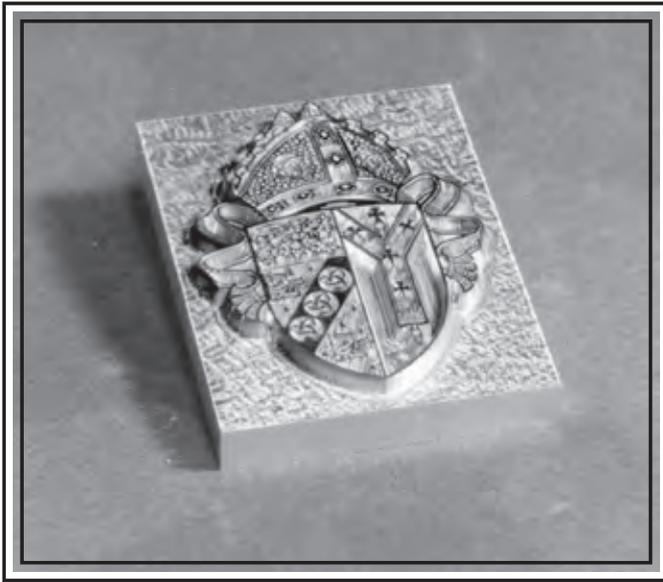

Birch handles are used on all of our tools for their resistance to splitting, whilst tangs are of smaller size than the shank and are fitted through purpose made domed brass washers to help reduce and deflect the heat from the centre of the handles.

Handle letters are supplied in sets of 40 consisting of A-Z 0-8 (6 used for 9) & AE OE . ,

They are supplied in strong wooden boxes. Individual letters are available if required.

BRASS DIES

Brass dies are manufactured by the same process as our handtools and type, the resulting print being clear and sharp on the softest of leathers. A selection of dies (reduced in size) which we have supplied are shown below. Our handtool patterns can also be produced as dies if required, as can family crests, logos or any custom designs. Quotations will be given on receipt of artworks.

LETTER FROM DAPHNE BEAUMONT-WRIGHT.

For nearly eighteen years - from soon after Roy Pettitt and Brian Skilton started up their own tool making business - we have enjoyed a friendship which I believe has been mutually beneficial.

And it all began with a little wheel.

My first finishing tools had come from Florence where they were cut by hand in a small back room overlooking the Arno by Papa Chelli until suddenly he died. They had included small rolls and fillets all made one third the size - and one third the price! - of the traditional three inch wheel and interchangeable using a specially designed long handled fork.

Over here when I wanted the same for my students, tool makers didn't want to know until I showed my small wheels to Roy and Brian who, as was always the case when I faced them with something different, were always immediately enthusiastic and willing to try them. And they sold!

Nothing I suggested was ever a problem, except possibly, the set of 4pt Edinburgh which nearly destroyed a promising friendship! They learnt to "dome" all the decorative hand tools, the handle letters and the large set of gouges I found illustrated in a French catalogue and a day at Guildford watching fifteen students all tooling, showed them what the different tools were for and the impossibility of using tools - pallets which were too long and gouges and decorative tools which were too flat; letters which were flat and hadn't an accurately angled groove on the shank to help position the impression or spine pallet which was curved like a banana - and the difference when the tools were properly made.

Brian's beautiful draughtsmanship means that they can make a tool from any logo, design, flower or little creature, a pair to an existing tool or part of a design to match the missing original when restoration needs.

This new catalogue is a triumph and contains a wonderful range of continental and UK tools, beautifully engraved, detailed and deeply cut and wheels which are correctly sighted and with handles which are a proper length.

Everything is cheerfully done to make the finishers job an easier one and on behalf of students the world over and myself I must thank Roy and Brian for employing their unique standard of craftsmanship for the benefit of so many bookbinders and wish them at least another eighteen years of well deserved success.

Daphne Beaumont-Wright

July 1998

FINISHING TOOL CATALOGUE SUPPLEMENT

Since publishing our 80 page catalogue of tools and equipment in 1998 we have continued to produce custom designs when required. Many of these designs have been reproduced from existing 17th and 18th century bindings (or in many cases fragments of bindings in need of restoration).

We have accumulated over 250 handtool and 150 roll masters and thought it was time they were made available to our many customers world-wide.

In addition there are a number of new type/handle letter styles.

The 18th century style taken from Samuel Johnson's "Lives of the English Poets" 1777. A complete set of books was sent to us by Frank Lehmann from the USA, who collaborated with us in the production of this typical 18th century face.

The 17th century face was researched and compiled from a number of bindings from around 1650, by Canadian binder Courtland Benson who supplied us with working drawings, in association with Wesley Baker from the USA and Trevor Lloyd from Wales.

We owe our thanks to the same three binders for their continued help in researching and supplying copies or drawings for many of the designs in this supplement.

The Student set has proved to be a very popular starter set and seems to have taken over from the rather dated Amateur sets.

The Miniature Book set has been requested for a number of years and with the assistance of Maureen Duke we have finally got together a selection of tools suitable for use on miniature books.
